PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 11+ years of experience building and scaling enterprise web applications using .NET and React. Key contributor to a large-scale benefits administration platform supporting 100+ global organisations, delivering across backend systems, APIs, frontend applications, and high-performance data pipelines. Experienced in leading small teams, mentoring developers, and driving cross-functional delivery in distributed environments. Currently seeking full-stack engineering opportunities in Poland, EU, or remote teams.

CORE COMPETENCIES

Backend & APIs: C#, .NET Framework, .NET 6–8, ASP.NET Core, REST APIs, Entity Framework, LINQ

Frontend: React, Next.js, TypeScript, JavaScript, ASP.NET WebForms

Data & Cloud: SQL Server, PostgreSQL, SSIS, SSRS, Azure, Azure DevOps, CI/CD, Docker

Architecture & Practices: OOP, SOLID, Design Patterns, Unit & Integration Testing, Code Reviews, Agile/Scrum

Security: OAuth2, OpenID Connect, Microsoft Entra ID, JWT, OWASP

Leadership: People Management, Mentoring, Remote Team Collaboration, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Software Engineer & People Manager · WTW Manila Global Delivery Center Ltd. · *Feb 2019 - Present*
Associate Software Engineer (Feb 2019) → + People Manager, APAC Shift (Mar 2022) → Lead Associate Software Engineer (Apr 2024)

- Core contributor to a large-scale, multi-tier benefits administration platform (200+ components) serving pension and health clients across 100+ global organizations
- Delivered across backend systems, REST APIs, React frontend, ASP.NET WebForms, SQL Server, and ETL pipelines
- Optimized a critical data export pipeline by eliminating non-SARGable predicates, restructuring queries into staged datasets, and introducing indexed intermediate tables—reducing runtime from 45 minutes to 20 seconds (135× improvement)
- Designed and implemented a factory-based provider pattern to resolve cross-module dependency issues, enabling scalable pension workflow extensions without circular dependencies
- Led APAC shift team (2 developers, 2 QAs), driving delivery, mentoring engineers, and managing performance and growth
- Acted as Scrum Master, SDET, and Technical Writer during transition periods, ensuring continuity across engineering and QA functions

Software Engineer - Automation · Deltek Systems (Philippines) Ltd. · *Jan 2016 - Jan 2019*

- Designed and built web and desktop test automation frameworks from scratch, reducing manual QA effort by ~50% and enabling non-technical testers to author automated tests
- Delivered two internal R&D tools (SSO platform, Test Results Manager) later adopted as standard solutions across multiple product teams; maintained the core automation framework used across the majority of the product portfolio

Programmer-Analyst / Assistant Manager · EastWest Banking Corporation · *Jul 2012 - Jan 2016*

- Contributed to core banking migration (Phoenix → Temenos T24), including interface development, system analysis, and production issue resolution
- Developed an in-house cheque warehousing system and compliance-critical banking applications and reports supporting multiple business units

EDUCATION

B.S. Computer Engineering · Mapua Institute of Technology · 2007 - 2012

Specialization: Microsoft .NET Framework · Thesis: Web-based Blood Pressure and ECG Monitoring System
